Dear Sir:

Enclosed is a Petition for Revival of an International Application for Patent Designating the U.S. Abandoned Unintentionally Under 37 CFR 1.137(b); a Transmittal Letter to the United States Designated/Elected Office (DO/EO/US) Concerning a Filing Under 35 USC § 371 with duplicate; a Preliminary Amendment; a Declaration and Power of Attorney, For Utility or Design Patent Application (37 CFR § 1.63); a Recordation Form Cover Sheet with duplicate; and an Assignment of Application.

Please charge the petition fee under 37 CFR § 1.17(m) and any additional fees which may be required to Deposit Account No. 13-3723. The entire delay in filing the required reply from the due date until the filing of this petition was unintentional. For the Examiner's benefit, a statement of the facts regarding the unintentional abandonment of the above-mentioned patent application is provided below.

STATEMENT OF FACTS

1. An agreement was executed between 3M Company and 3M Innovative Properties Company (collectively "3M"), and Xennia Technology Limited ("Xennia") on December 9, 2002, which had an effective date of January 1, 2001. This agreement was for development work completed by Xennia at 3M's expense for an ink-jet printing system. This agreement also involved the assignment of patent rights from Xennia to 3M, including the PCT patent application referenced above. Also in this agreement, 3M granted Xennia an exclusive license under the patent rights in certain fields, and there was a provision that if 3M proposed to abandon any patent rights, then 3M would first notify Xennia of its intention and give Xennia a period of two (2) months to request 3M to assign the patent rights, which it was

proposing to abandon, to Xennia. If Xennia requested that such patent rights be assigned to them, then Xennia would be responsible for the future prosecution of the patent rights. If Xennia did not request that such patent rights be assigned to them, then 3M would be free to abandon the patent rights.

2. 3M has an agreement tracking system in its legal department for storage of legal agreements. All intellectual property-related agreements are scanned and abstracted for future searching and tracking by personnel in the legal department. If an agreement involves patent applications or issued patents, those patent rights are also "flagged" in the legal department's docketing system. For example, particular patent applications may be marked with an "abandonment blocked" status on the docketing system, if 3M is unable to abandon the patent applications without first seeking the consent of a third party. If a business unit decides to abandon a patent application, the docketing clerk first checks the docketing system to see if there are any abandonment blocks on the docketing system for that patent application. If there are no abandonment blocks on the docketing system for that patent application, then the docketing clerk sends a letter to the prosecuting attorney to discontinue prosecution of the patent application.
3. Unfortunately, the agreement between 3M and Xennia was unintentionally not recorded in 3M's agreement tracking system and as a result, the patent applications referenced in the agreement, including the PCT patent application referenced above, unintentionally did not receive an "abandonment blocked" status on 3M's docketing system.
4. On September 22, 2003, the business unit responsible for the PCT patent application decided to discontinue prosecution of the patent application. However, both the business unit and the attorney responsible for the business unit were not aware of the agreement between 3M and Xennia, due to the fact that the agreement was not stored in the agreement tracking system.
5. Sometime between September 22, 2003 and October 28, 2003, the docketing clerk searched the docketing system to see if there were any abandonment blocks on the system related to the PCT patent application and found none. On October 28, 2003, the docketing clerk mailed a letter to 3M's prosecuting attorney of the PCT patent application at Vossius & Partner, located in Germany, communicating that 3M decided to discontinue prosecution of the PCT patent application referenced above.
6. On February 19, 2004, 3M was mailed a communication from the European Patent Office that the PCT patent application referenced above was withdrawn for failure to pay the appropriate fees within the specified time.
7. On October 12, 2004, Xennia contacted 3M wanting to know why 3M had not notified Xennia of 3M's intention to abandon the PCT patent application, and had not given Xennia a period of two (2) months to request 3M to assign the PCT patent application to Xennia before 3M abandoned the PCT patent application, per the agreement. A copy of the agreement was sent by Xennia to 3M, and 3M started its investigation into why the agreement was not located on the agreement tracking system. As soon as 3M identified the reason for the unintentional abandonment, 3M started the process to revive the patent applications referenced in the agreement, including the PCT patent application referenced above.

Favorable consideration of the petition is respectfully requested.

Respectfully submitted,
